

MOBILITY IS EVERYTHING

Getting to the Fire is important
Getting out of the way of the Fire is vitally important.

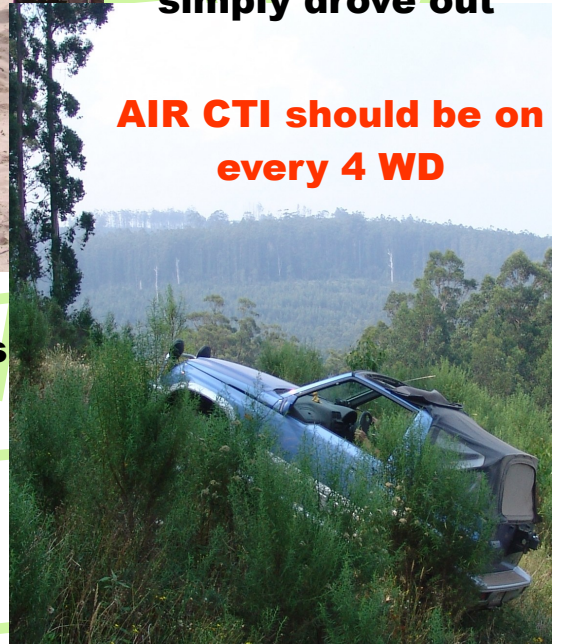

We intentionally bogged this to the axles.
We lowered the tyre pressure and simply drove out

AIR CTI should be on every 4 WD

With AIR CTI, a simple twist of the control knobs adjusts the tyre pressure to suit the conditions, from highways to deserts to rocky track, AIR CTI.

Dash mounted controls and gauge keeps the driver in control. AIR CTI automatically re-inflates punctured tyres, keeping you on the road.

In every off road condition, lower tyre pressures benefit in every way. Better traction, better control, better handling, better stopping, less damage to the vehicle, and much greater safety. From the Simpson Desert to our mountains, AIR CTI should be on every truck or 4 WD.

TREAD SOFTLY SAFELY

AIR CTI, 120 Walhalla Rd. Moe, Vic. 3825

Ph 03 5127 6128 www.aircti.com

This Toyota crosses the Simpson 6 to 10 times each year
